Our Cabbage Seeds are the Most Dependable Stocks Obtainable

CAULIFLOWER

In judging Cauliflower we use the following standards as being essential: Short, strong stem; broad outer leaves; inner leaves folded well over the heart for self protection; good weight and depth of head at maturity; resistance to "riciness" and "fuzziness"; absence of small green leaves coming through the head. All these fine points are bred into the seed and that's why so many growers prefer our stocks.

	Oz.	1/4 lb.	Lb.

White Mountain Cauliflower

Super Snowball Cauliflower

	Oz.	1/4 lb.	Lb.
White Mountain. This excellent variety is used principally for fall crop. The plant is a vigorous type with broad, strong leaves giving good protection for the large, pure white heads. We regard this strain as the most perfect and therefore the most profitable one to grow ..	\$2.75	\$8.50	\$28.00
Purple Beauty. This unusual sort came to us from Italy. The heads are small, measuring from 2 1/2 to 4 inches across the top. Color purplish green with green stem. Matures in 90 days from seeding	3.00	9.00	32.00

Disinfect your hotbed soil to control black leg or black rot and other diseases on Cabbage and Cauliflower. Dissolve a half ounce of Semesan in 8 quarts of water for every sash. Sprinkle well and wait 3 days or more before seeding.
For outside seeding treat seeds with Arasan.
